

Product Profile

28-03R
2800 CHU

Product Characteristics*

Key Strengths

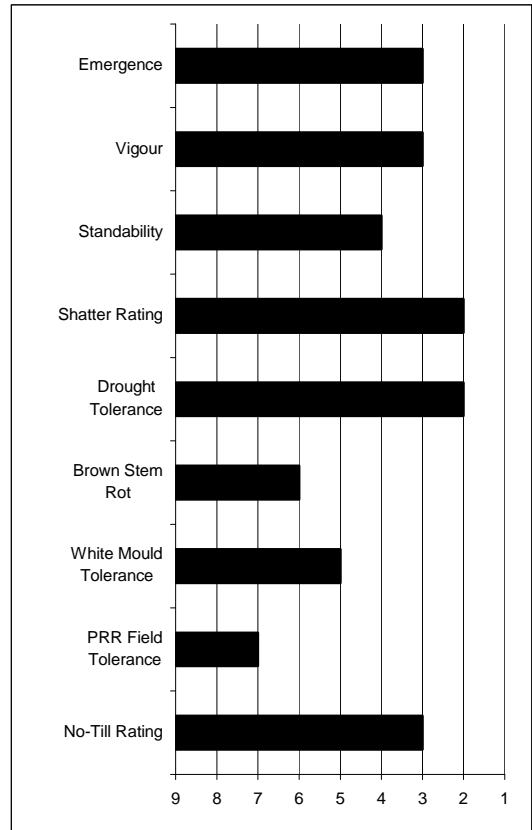

- ◆ Multi-race Phytophthora resistance with Rps1k gene
- ◆ Aggressive, tall plant type with excellent emergence
- ◆ High yield potential

Plant Description

Growth Habit	Intermediate
Flower Colour	Purple
Pubescence Colour	Tawny
Hilum Colour	Black
Plant Height	Tall
Approx. Seed Size	5900 seeds/kg
PRR Resistance Gene	Rps1k
Protein Content	Average
Oil Content	Average

Management Tips

- ◆ Plant at medium rates on soils with average fertility
- ◆ Suitable for all soil types and row widths

*Based on Monsanto-conducted trials. Relative to other Monsanto varieties.
 Rating scale: 1-2 = Excellent, 3-4 = Very Good
 5-6 = Good, 7-8 = Fail, 9 = Poor

Notes

Always read and follow label directions. The agronomic ratings stated in the product agronomic charts were developed from Monsanto's internally conducted trials, which utilize commonly accepted methodology. These ratings can be used for comparative purposes between our established hybrids and new releases. They may not reflect total comparative performance. Actual performance may vary based on a number of factors including, without limitation, the prevalence of disease causing organisms or insect pest and environmental and agronomic conditions.
