

919 MF Blend - Alfalfa

Canada 2004-2005

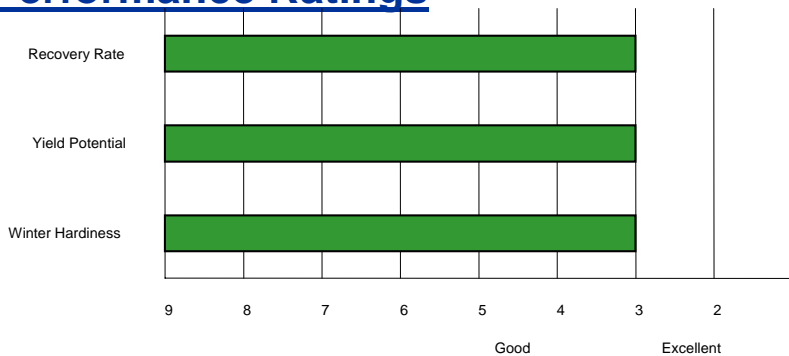

Forage

Key Features

- ✓ Blend of NK proprietary alfalfa (blend includes a quality multifoliate and a winterhardy creeper)
- ✓ Consistent performance across environments
- ✓ Broad Adaptability
- ✓ Maturity - Medium

Performance Ratings

Disease Resistance

Bacterial Wilt	R
Verticillium Wilt	R
Phytophthora Root Rot	HR

HR= Highly Resistant, R = Resistant

Positioning/Management Statement

- ✓ Adapted to medium-long term forage production systems.
- ✓ The blend allows for maximum stand establishment over variable fields, good recovery, good winter hardiness, etc.
- ✓ Good choice for beef or dairy producers.
- ✓ Can be used for a 2-3 cut or 1 cut/grazing system.

Source: ¹ All ratings for agronomic characteristics and disease resistance are based on data and field observations collected by NK from multiple locations over multiple years. They represent comparisons with products sold by the company only.

² Multifoliate expression will vary depending on local growing conditions. Maximum expression will occur with optimum growing conditions.
